**TEROSON PU 8597 HMLC- ADESIVO MONOCOMPONENTE PER L'INCOLLAGGIO DEI CRISTALLI**
*TEROSON PU 8597 HMLC- COLLAGE VITRAGE*
*TEROSON PU 8597 HMLC- DIRECT GLAZING*
*TEROSON PU 8597 HMLC- KLEBEN UND DICHTEN VON AUTOGLAS*
*TEROSON PU 8597 HMLC- ADHESIVO SELLADOR MONOCOMPONENTE*

**Note:** Teroson 8597 HMLC è un sigillante monocomponente a base poliuretana per la sostituzione dei vetri auto, estremamente pastoso e reagisce con l'umidità dando luogo ad un materiale gommoso ed elastico. Il tempo di formazione della pelle ed il tempo di reticolazione dipendono dall'umidità, dalla temperatura; in più, la cura totale, dalla profondità del giunto. Un incremento della temperatura e dell'umidità possono accelerare la formazione della pelle e la reticolazione mentre un abbassamento della temperatura e dell'umidità possono ritardare il processo. Teroson PU 8519 P è un primer / attivatore molto fluido a base di poliuretano contenente solventi. Il prodotto si distingue per il suo buon potere coprente e la sua eccellente stabilità agli UV; non contiene idrocarburi clorurati o aromatici. Teroson PU 8519 P è inoltre indicato per la protezione dalla corrosione per piccoli danni alla vernice. Teroson PU 8519 P è indispensabile come promotore di adesione di Teroson PU 8597 HMLC al vetro e come attivatore per il vecchio sigillante.

**Notes:** Teroson 8597 HMLC is a 1-component, extremely sag-resistant direct glazing adhesive / sealant based on polyurethane, which crosslinks (cures) to a rubber-elastic material under the influence of atmospheric moisture. The skin formation time and the curing time depend on the moisture of the air and the temperature; in addition, the curing time depends on the depth of the joint. An increase in temperature and atmospheric humidity can accelerate skin formation and curing, whereas a lower content of atmospheric humidity and lower temperatures delay the reaction. Teroson PU 8519 P is a primer / activator very fluid based polyurethane containing solvents. The product stands out for its good covering power and excellent UV stability; it doesn't contain chlorinated or aromatic hydrocarbons. Teroson PU 8519 P is also suitable for the protection of the corrosion damage to the small vernice. Teroson PU 8519 P is indispensable as an adhesion promoter of Teroson 8597 HMLC
